

DECISION MATRIX

BATH RECLINER

General:

- Weight of client?
- Seat width of client? Sling width is 16"

Backrest: Standard backrest length is 30"

- Do you want the backrest to stop above the clients head for full support?
- Do you want the backrest to stop at the clients lower head for support and ease of hair washing?
- Does the client require a Torso Belt?
- Are Drop-Down Armrests necessary for the client? (Adds 5.5" to overall width)
- Are Laterals necessary for further trunk support?
- Is a Head Bolster necessary for head placement?
- Does the client need an "H" or "X" Harness?
- Would a padded panel seat and back in place of the tension adjustable mesh benefit the client?
- Would the client benefit from an adjustable padded headrest?

Seating: Standard seat depth is 17"

- Does the client need support for their lower legs other than the pull-out bar? (Calf Extension)
- Are Ankle Straps necessary?

Rolling Chassis: Working height is set at 29"

- Is this working height best for the care giver?

Tub Area:

- Has the manufacturer reviewed the completed bathroom diagram for necessary modification?

Convenience:

- Would a Shower Wand Holder or Shower Caddie benefit the client?
